

Sentiment Timing

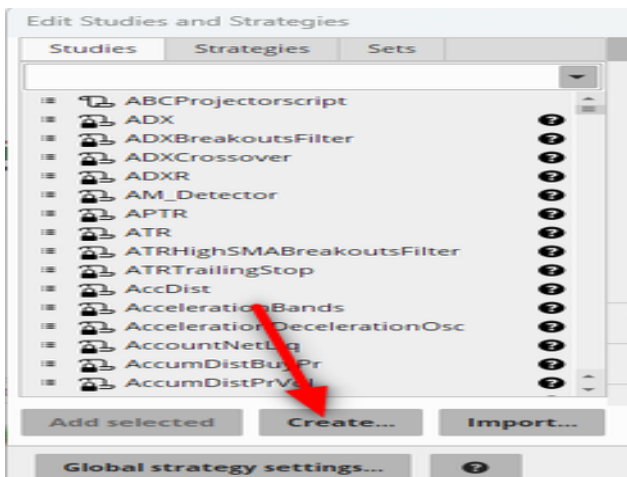

Institutional Pivot Matrix™ Installation Guide for ThinkorSwim

Step 1 – Open ThinkorSwim

Step 2 – Click Studies

Step 3 – Click Create

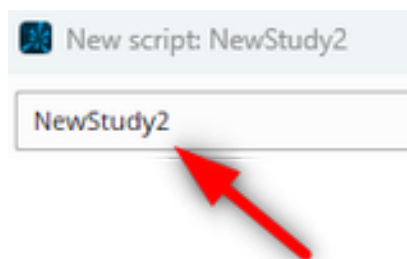

Step 4 – Rename the study at the top to match the file being installed
(Example: IPM_White_Background)

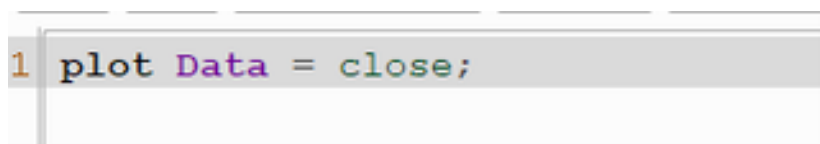

Each module should have its own name:

- IPM_White_Background
- IPM_Dark_Background
- IPM_BuySell
- IPM_Lower
- IPM_Backtest

This prevents user confusion later.

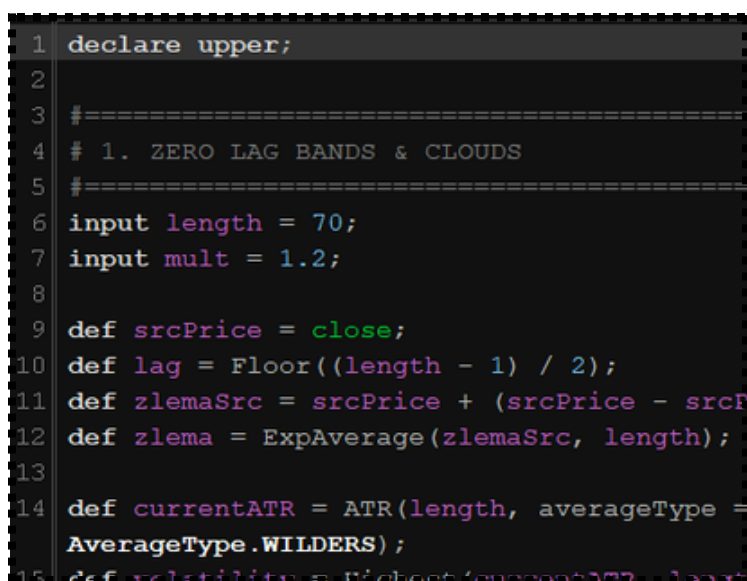

Step 5– Delete the default script
(Screenshot highlighting plot Data = close;)

Delete Plot Data=Close; and paste entire code inside

Step 6 – Paste the IPM code

Installation Complete

The Institutional Pivot Matrix™ is now active on your ThinkorSwim platform.

Confirm that the zones and modules are properly loaded before live execution.

If you experience any installation issues or have questions, please contact:
