

2026 Institutional Astro Roadmap™

The 2026 Institutional Astro Roadmap outlines projected macro bullish, bearish, and neutral cycle phases for the year ahead.

This framework highlights anticipated structural inflection windows, including projected acceleration periods, consolidation phases, and potential topping formations.

The roadmap is designed to complement the Institutional Pivot Matrix™ by providing higher-timeframe directional context. While IPM identifies institutional price zones in real time, the Astro Roadmap provides forward-looking timing bias.

Use the roadmap to:

- Frame broader market expectations
- Anticipate potential volatility windows
- Align structural bias with IPM accumulation/distribution zones
